¹ Excludes agriculture. Columbia.

² Includes the Yukon and Northwest Territories.

³ Included with British Columbia.

Section 3.—Aggregate Productivity Trends

Increasing interest in questions of economic growth, cost-structure and international competitiveness, and in the relationships between output, employment, earnings and prices has focused attention on productivity as a framework within which such problems can usefully be discussed. Recognizing this interest, the Dominion Bureau of Statistics now publishes annual indexes of output per person employed and per man-hour in Canada covering the commercial industries as a whole, with separate detail for agriculture and the commercial non-agricultural industries, manufacturing and the residual commercial non-manufacturing industries. Similar indexes are also published for the total and non-agricultural goods-producing industries, and the commercial service-producing industries of the same aggregate.*

* See DBS Reference Paper *Indexes of Output per Person Employed and per Man-Hour in Canada, Commercial Non-agricultural Industries, 1947-63* (Catalogue No. 14-501) and *Aggregate Productivity Trends, 1946-66* (Catalogue No. 14-201).
