

The sources of credit market lending remained broadly the same as in 1971 although financial institutions other than the chartered banks grew somewhat more rapidly than the chartered banks themselves, increasing their net new lending to \$5,587 million compared with \$4,666 million in 1971. The chartered banks provided about the same substantial amount of financing as in 1971 as did public financial institutions. The rest of the world sector increased its net lending to \$1,587 million from \$223 million in 1971. To a large extent, this was associated with the resumption of large sales abroad of new provincial and municipal bond issues. Funds provided by "other domestic sectors", on the other hand, were sharply lower in 1972 reflecting, in part, a marked decrease in purchases of Canada Savings Bonds following the record levels of 1971. The series for "other domestic sectors" is dominated by personal sector data and should be interpreted with caution on this account. Personal sector data are produced largely by residual estimating techniques which may be subject to considerable error.

A summary matrix of the financial flow system is presented in Table 21.36. More detailed quarterly data for individual sectors and summary matrices are available.

### Sources

- 21.1 Gross National Product Division, System of National Accounts (Current) Branch, Statistics Canada.
- 21.2.1 - 21.2.2 Industry Product Division, System of National Accounts (Current) Branch, Statistics Canada. *Indexes of real domestic product by industry, 1961-69, 1961=100*, Statistics Canada Occasional Paper (Cat. No. 61-510), gives data for 1961-69. For the period 1935-60, see *Real domestic product by industry, 1961 base* (Cat. No. 61-506). For a detailed explanation of concepts, methods and limitations, see *Indexes of real domestic product by industry of origin, 1935-61* (Cat. No. 61-505) and *Revised index of industrial production, 1935-57 (1949=100)* (Cat. No. 61-502). Current data on annual, quarterly and monthly bases are published in Statistics Canada monthly *Indexes of real domestic product by industry (including the index of production)* (Cat. No. 61-005).
- 21.2.3 Structural Analysis and Productivity Research Division, System of National Accounts (Structural) Branch, Statistics Canada. Productivity data published by Statistics Canada are in the form of annual indexes of output per person employed and per man-hour: *Indexes of output per person employed and per man-hour in Canada, commercial nonagricultural industries, 1947-63* (Cat. No. 14-501) and *Aggregate productivity trends* (Cat. No. 14-201).
- 21.3 Prices Division, General Statistics Branch, Statistics Canada. Indexes of selling prices of some 100 Canadian manufacturing industries, are available from the monthly Statistics Canada publication *Prices and price indexes* (Cat. No. 62-002). Price indexes relating to merchandise exports and imports are published monthly in Cat. No. 65-004 and No. 65-007, respectively. Implicit price indexes for gross national product and its main components are published quarterly in Cat. No. 13-001. A comprehensive description of the consumer price index is contained in *The consumer price index (1961=100) - revision based on 1967 expenditures* (Cat. No. 62-539). Results from the 1969 family expenditure survey are available in four volumes under the general title *Family expenditure in Canada, 1969* (Cat. Nos. 62-535 to 62-538 inclusive). Results from the 1969 food expenditure survey are available in two volumes entitled *Family food expenditure in Canada, 1969* (Cat. Nos. 62-531 and 62-532). Earlier surveys have been published in occasional reports under the titles *Urban family expenditure* (1959, 1962, 1964 and 1967); *City family expenditure* (1953, 1955 and 1957); *Urban family food expenditure* (1953, 1955, 1957 and 1962); and *Canadian non-farm family expenditures* (1947-48). Results from the 1971 survey will be published under the title *Urban family expenditure on shelter and household durables, 1971*. Price indexes for construction and capital goods are available in summary form in *Prices and price indexes* (Cat. No. 62-002) and in detail in the *Construction price statistics service bulletin* (Cat. No. 62-006). The building material price indexes are drawn from the system of industry selling price indexes published in *Industry selling price indexes 1956-1968* (Cat. No. 62-528). Monthly and certain weekly security price indexes appear in the Statistics Canada monthly publication *Prices and price indexes* (Cat. No. 62-002) and a weekly Statistics Canada report gives indexes on a weekly basis for all groups and subgroups.
- 21.4 Balance of Payments Division, System of National Accounts (Current) Branch, Statistics Canada.
- 21.5 Balance of Payments Division, System of National Accounts (Current) Branch, Statistics Canada. Statistics Canada report *Canada's international investment position* (Cat. No. 67-202) was published in December 1971, bringing together available data on Canada's international investment position for the period 1926-67 and extending and revising material published in *Canada's international investment position, 1926-54* and subsequent releases in Canada's balance of international payments reports. The main summary tables contain data from 1926 to 1970, while most of the detail extends only to 1967.
