## x Canada Year Book 1980-81

Temperature
Fahrenheit temperature = 1.8 (Celsius temperature) +32
Celsius temperature = 5/9 (Fahrenheit temperature -32)

The following weights and measures are used in connection with the principal field crops and fruits:

| Crops                                           | Pounds per bushel | Kilograms<br>per bushel | Bushels<br>per 1 000 kg (1 t) |
|-------------------------------------------------|-------------------|-------------------------|-------------------------------|
| Wheat, potatoes and peas                        | 60                | 27.2155                 | 36.7437                       |
| Wheat flour                                     | 43,48             | 19.721 4                | 50.7063                       |
| Oats                                            | 34                | 15.4221                 | 64.8418                       |
| Barley and buckwheat                            | 48                | 21,7724                 | 45.9296                       |
| Rye, flaxseed and corn                          | 56                | 25,401 2                | 39.3682                       |
| Mixed grains                                    | 45                | 20.4117                 | 48.9916                       |
| Rapeseed, mustard seed, pears, plums, cherries, |                   |                         |                               |
| peaches and apricots                            | 50                | 22,679 6                | 44.0925                       |
| Sunflower seed                                  | 24                | 10.886 2                | 91.8593                       |
| Apples                                          | 42                | 19.0509                 | 52,4910                       |

Strawberries and raspberries 1 kg = 1.47 quarts in BC

= 1.76 quarts in all other provinces

To produce 100 kg of flour it takes 138 kg of wheat.

<sup>\*</sup>Gross registered tonnage of a ship, as used by Lloyd's Register of Shipping, is a measurement of the total capacity of the ship and is not a measure of weight. Net registered tonnage equals gross registered tonnage minus space used for accommodation, machinery, engine area and fuel storage, and so states the cargo carrying ability of the ship.
