

### 13.6 Expo 86

In Vancouver BC, an international exposition on transportation and communications with the theme *World in Motion, World in Touch* has been planned for May to October 1986. The principal site is BC Place along 52 hectares of waterfront property on the north shore of False Creek basin as a setting for exhibits from many countries and all Canadian provinces. Expo 86 is part of a year-long celebration of the 100th anniversary of the city of Vancouver.

Canada Place, at the foot of Burrard St. on the Vancouver waterfront, is the site of the Canada pavilion. The architecture is marine in theme, suggesting a prow thrusting into the sea, sails catching the wind and a liner's superstructure. Included in the complex are new cruise ship facilities, public plazas and promenades, a theatre, a hotel and a world trade centre. Connecting Canada Place and BC Place is a new advanced light rapid transit system.
