<sup>1</sup> The Transportation Division has decided to use the term "domestic" rather than "coastwise" when referring to marine activity, so as to indicate that this activity includes inland shipping as well.

<sup>2</sup> The capacity of the spaces within the hull, and the enclosed spaces above the deck, available for cargo and passengers; excluding spaces used for the accommodation of officers and crew, navigation, propelling machinery and fuel. A register ton is equivalent to 100 cu ft and it is expected that this internationally recognized measure, like the nautical mile and the knot, will continue in use for some considerable time.
