¹ Statistics for the years 1970-82 were compiled on the basis of the 1970 edition of the Standard Industrial Classification (SIC), while data for the 1982 (restated) and subsequent years have been compiled on the basis of the 1980 revision of the Standard Industrial Classification. Thus 1982 is a "link year" to which the reader may refer to measure the impact of the change in classification on the various manufacturing statistics.

² Cannot be reported separately for manufacturing and non-manufacturing activities but related substantially to manufacturing activity.

³ From 1970-81 inclusive, the cost of fuel and electricity was not collected separately for small firms and was included in the cost of materials and supplies used.

⁴ Some 3,820 establishments with manufacturing shipments of \$2,257 million were added to the census in 1978 as a result of improved coverage, mostly of small establishments.

⁵ Some 1,142 establishments with manufacturing shipments of \$557 million were added to the census in 1979 as a result of improved coverage, mostly of small establishments.

⁶ Data for 1982 restated to the 1980 revision of the Standard Industrial Classification.

⁷ Includes production and related workers, administrative and office employees, sales, distribution and other employees; excludes working owners and partners.

⁸ Includes supplies used in both manufacturing and non-manufacturing activity.

⁹ Includes shipments of goods of own manufacture, value of shipments of goods purchased for resale and other operational revenue.

¹⁰ Value of total operational revenue less total costs of materials, supplies, fuel and electricity used and goods purchased for resale in the same condition; all adjusted for inventory changes where required.
