

THE CANADA YEAR BOOK 1906

This volume of the Year Book, being 11 of the Second Series, brings all available statistics of Canada down to the end of the fiscal year 1906. The trade tables have been changed and enlarged to embrace by quantities and values imports and exports under the heads of agriculture, animals and their products, fisheries, forest products, manufactures and miscellaneous articles separately for Britain, the United States, other countries and all countries for the five fiscal years 1902-1906. A number of new tables have also been added to complete more fully the statistics of the Dominion. Among the most important of these are tables of the census of manufactures of Canada for the calendar year 1905, taken in 1906, and of the population and agriculture of the Northwest provinces in 1906 taken in June of that year. The notes of Events of the Year have been prepared from original and official sources of information, following the plan adopted in last year's volume.

ARCHIBALD BLUE,
