

Births in Urban Centres.—Table 11 shows the number of live births in the urban centres of Canada with 10,000 population or over in 1941. The five-year averages for 1936-40 show births by place of occurrence. Many of these births were to women who lived elsewhere. The figures for 1941-45 are by the residence of the mother, and show the number of births, wherever occurring, to residents of each centre. The two sets of figures are thus not comparable.

11.—Live Births in Urban Centres of 10,000 Population or Over, 1941-45, with Five-Year Averages, 1936-45

NOTE.—Figures are by place of occurrence previous to 1941; for 1941 and subsequent years they are by residence.
