

**Deaths in Urban Centres.**—Deaths in urban centres of 10,000 population or over in 1941 are shown in Table 23. Taking the years in which deaths are classified by residence, the death rate in urban centres varies only slightly from the death rate of their respective provinces. However, due to the influx of people from the rural areas, the age distribution of the population in urban centres is often more favourable to a low death rate than that of the provinces as a whole.

**23.—Deaths in Urban Centres of 10,000 Population or Over, 1941-45, with Five-Year Averages, 1936-45**

NOTE.—Figures are by place of occurrence previous to 1941; for 1941 and subsequent years they are by residence.
