Estimated Population of the World by Continents.-The statement below presents adjusted estimates of the 1961 mid-year population of the world by continental divisions. These aggregates do not coincide exactly with the sum of the figures for individual countries and territories because they include, in addition, adjustments for overand under-enumeration, over-estimation, data for categories of population not regularly included in the official figures, and approximations for those countries that have not provided official 1961 data. The estimates are as follows:-

| Continental Division | Number |
