and values of articles to be added to manufactures in those several tables, if so classified. If added to the exports of manufactures as given in table xxi, p. 66, or in table xxix, p. 129, the total values would be \$121,287,839 for 1906, \$127,496,446 for 1908, \$121,286,176 for 1909, and \$143,642,353 for 1910. Added to the exports of manufactures to Britain in table xxi the total value for 1910 would be \$58,393,791, to the United States \$61,796,596, and to other countries \$23,451,966; and the total increase in the period from 1906 to 1910 would be over 18 per cent. But of course the chief component value of these exports is that of raw material.
