NOTE.—The sign minus (–) denotes a decrease.

**Sex Ratios.**—The male population of Canada was returned in 1911 as 3,821,995 and the female as 3,384,648; so that the excess of males over females is 437,347—an excess percentage of 13—or of 130 males per 1,000 females. Reciprocally the number of females per 1,000 males is 886, the deficiency of females as compared with males being probably greater in Canada than in any other country.
