publication of the 1934-35 Year Book.

² Figures for this year have been revised since

Annual Statistics of Fruit Production.—Table 28 shows the estimated quantities and values of commercial fruits produced in Canada in 1933 and 1934.

Owing to changes in the method of collecting these statistics, in some instances they cannot be considered as strictly comparable with those published in previous editions of the Year Book. Figures for the years 1923-31 on the old basis will be found at p. 1054 of the 1932 Year Book.

28.—Estimated Quantities and Values of Commercial Fruit Production in Canada, 1933 and 1934.

The Tree Nursery Industry.—The first Canadian commercial nursery was established near Fonthill, Ont., and it was followed within a few years by the establishment of a nursery in Toronto by a Rochester, N.Y., firm. Since that time the industry has spread as the country has developed, until to-day there are over 200 firms growing or dealing in nursery stock of all kinds, including fruit trees.
