<b>Totals, Fish and Fishery Products...</b>	<b>—</b>	<b>18,752,107</b>	<b>—</b>	<b>20,223,610</b>	<b>—</b>	<b>22,497,118</b>

The current trend of the fisheries, as shown by the statistics given in the series of tables above, is upward in every feature including yields, value, capital invested, employees engaged and trade. Preliminary statistics for 1935 show a moderate recession in the first ten months but on the whole the gains have been fairly well maintained.
