Movement of Population.—In the Census of 1941 data were collected for the first time regarding movement of population and length of residence in the province of residence. Three questions were asked on the census schedules. The first was concerned with the length of residence of the individual concerned in the province where he or she resided on June 2, 1941. The second question required information as to the province or country of last residence and the third related to the rural or urban classification of the present or past place of residence. The following tables summarize the information.
