

While the value of salted codfish exports increased substantially from 1938 to 1948, the ratio of this value to the total value of all fisheries declined considerably after 1942. This trend is related to the increasingly important contribution to export values made by other products, notably fresh and frozen cod fillets, herring and lobster. Export values of the principal fishery products, other than salted codfish, are shown in Table 11.

10.—Percentage Distribution of Newfoundland Exports of Salted Codfish, by Countries, 1938, 1945, 1947 and 1948

Nors.—This table is calculated on quantities shipped; exports of wet-salted codfish have been converted to dried weight on the basis of 140 lb. of wet-salted to one quintal of dried.
