¹ Newfoundland data excludes agriculture, fisheries, trapping and fish processing. ² Forestry and construction figures for the Yukon and Northwest Territories are included with British Columbia.

Per Capita Production.—The per capita net value of production in nine provinces (Newfoundland excluded) rose to \$784 in 1950 as compared with \$734 in 1949 and \$592 in 1947. Ontario continued by a wide margin to hold first place among the provinces with a per capita figure of \$1,008, while British Columbia with \$852 regained second position from Alberta; the latter fell back into third place with a per capita production of \$780. Quebec, Saskatchewan and Manitoba followed in that order with per capita figures of \$693, \$634 and \$618. The last three positions were held by the Maritime Provinces: New Brunswick, Nova Scotia and Prince Edward Island showed per capita output levels of \$440, \$410 and \$303, respectively. Compared with 1949, all provinces showed gains in this analysis except Saskatchewan which receded sharply owing to lower agricultural returns, and Nova Scotia which remained unchanged.

5.—Per Capita Net Value of Production with Percentage Variation from National Average, by Province, 1946-50

Province	1946		1947		1948		1949		1950
