

World Pulp Statistics.—Figures of production, exports and imports of pulp for certain countries of the world have again become available after the interruption caused by World War II and are shown for 1951 in Table 18. It is estimated that these countries produce approximately three-quarters of the world supply of pulp.

Paper Production.—During 1951 there were 92 establishments producing paper and paper board in Canada as compared with 91 in 1950. In addition to newsprint, Canadian mills have a highly developed production of fine paper, wrapping paper, tissues, paper board and other cellulose products.
