<sup>1</sup> Includes express, baggage, mail and other cars.

<sup>2</sup> Duplications included.

<sup>3</sup> Newfoundland

included for this and subsequent years.

<sup>4</sup> Includes caboose miles but excludes miles made in passenger

and non-revenue trains.

<sup>5</sup> Duplications eliminated; see Table 9 for details of freight carried.

Revenue freight carried by the railways in 1952 showed little change over 1951. The decreases registered by the animal, mine, forest products, and manufactures and miscellaneous groups were counterbalanced by a substantial increase in the agricultural group. The principal commodities showing an increase over 1951 were wheat, oats, sand and gravel, stone, and gasoline and petroleum products.

## 9.—Commodities Hauled as Freight on Steam Railways, 1948-52

NOTE.—In this table duplications are eliminated, i.e., the same freight handled by two or more railways is counted only once. The statistics do not include the United States lines of the Canadian National Railways, but the link of the Canadian Pacific Railway line across Maine, U.S.A., is included, as are the Canadian sections of United States railways.
