¹ Includes privately operated social and welfare institutions.

A summary of the capital expenditures in each province for the years 1954-56 is given in Table 4. Such expenditures represent gross additions to the capital stock of the province and are a reflection of economic activity in that area, but the actual production of these assets may generate its major employment in income-giving effects in other regions. For example the spending of millions of dollars on oil refineries and pipelines in western Canada means activity in the steel industries of Ontario as well as construction activity in the Prairie Provinces.
