<sup>1</sup> Chiffres préliminaires. <sup>2</sup> Comprend 36,960 lb. du Nouveau-Brunswick et de l'Alberta.

**Production mondiale de cuivre.**—La production mondiale de cuivre en 1933 est estimée à 1,120,000 tonnes courtes, comparativement à 2,150,400 en 1929, année record. La production du Canada étant de 149,992 tonnes, soit environ 13.4 p.c. du total mondial, il détient la troisième place parmi les pays producteurs.

**16.—Production de cuivre par les principaux producteurs de l'univers, 1913-33.<sup>1</sup>**
