

Les valeurs sur lesquelles les chiffres du tableau 5 sont basés sont celles des produits poissonniers tels que mis sur le marché, c'est-à-dire qu'elles comprennent la valeur ajoutée par le conditionnement comme la conserverie, la saurisserie, etc. D'un autre côté, les indices du volume sont basés sur les quantités de poisson pris et débarqué.

5.—Pourcentages de la valeur totale et indices du volume de production des pêcheries, par principales espèces de poisson de mer et d'eau douce, 1931-42

NOTA.—Basés sur les valeurs des ventes et sur les quantités prises.
