

### 3.—Conjugal Condition.

In Table 11 are given in summary form, together with percentages, the statistics of the conjugal condition of the population, as single, married, widowed, divorced, legally separated and not given, for the six censuses since 1871. Especially notable is the larger percentage of married in the more recent years. This is mainly attributable to the larger percentage of adults to total population in our own time. Noteworthy also is the larger percentage of divorced and legally separated in recent years. The reader should also consult in the index the heading "Divorces in Canada, 1868-1922," for the number of divorces granted in each year since Confederation.

The conjugal condition of the 1921 population is shown by provinces in Table 12 and by age-groups in Table 13.
